

HASANOĞLU
GROUP

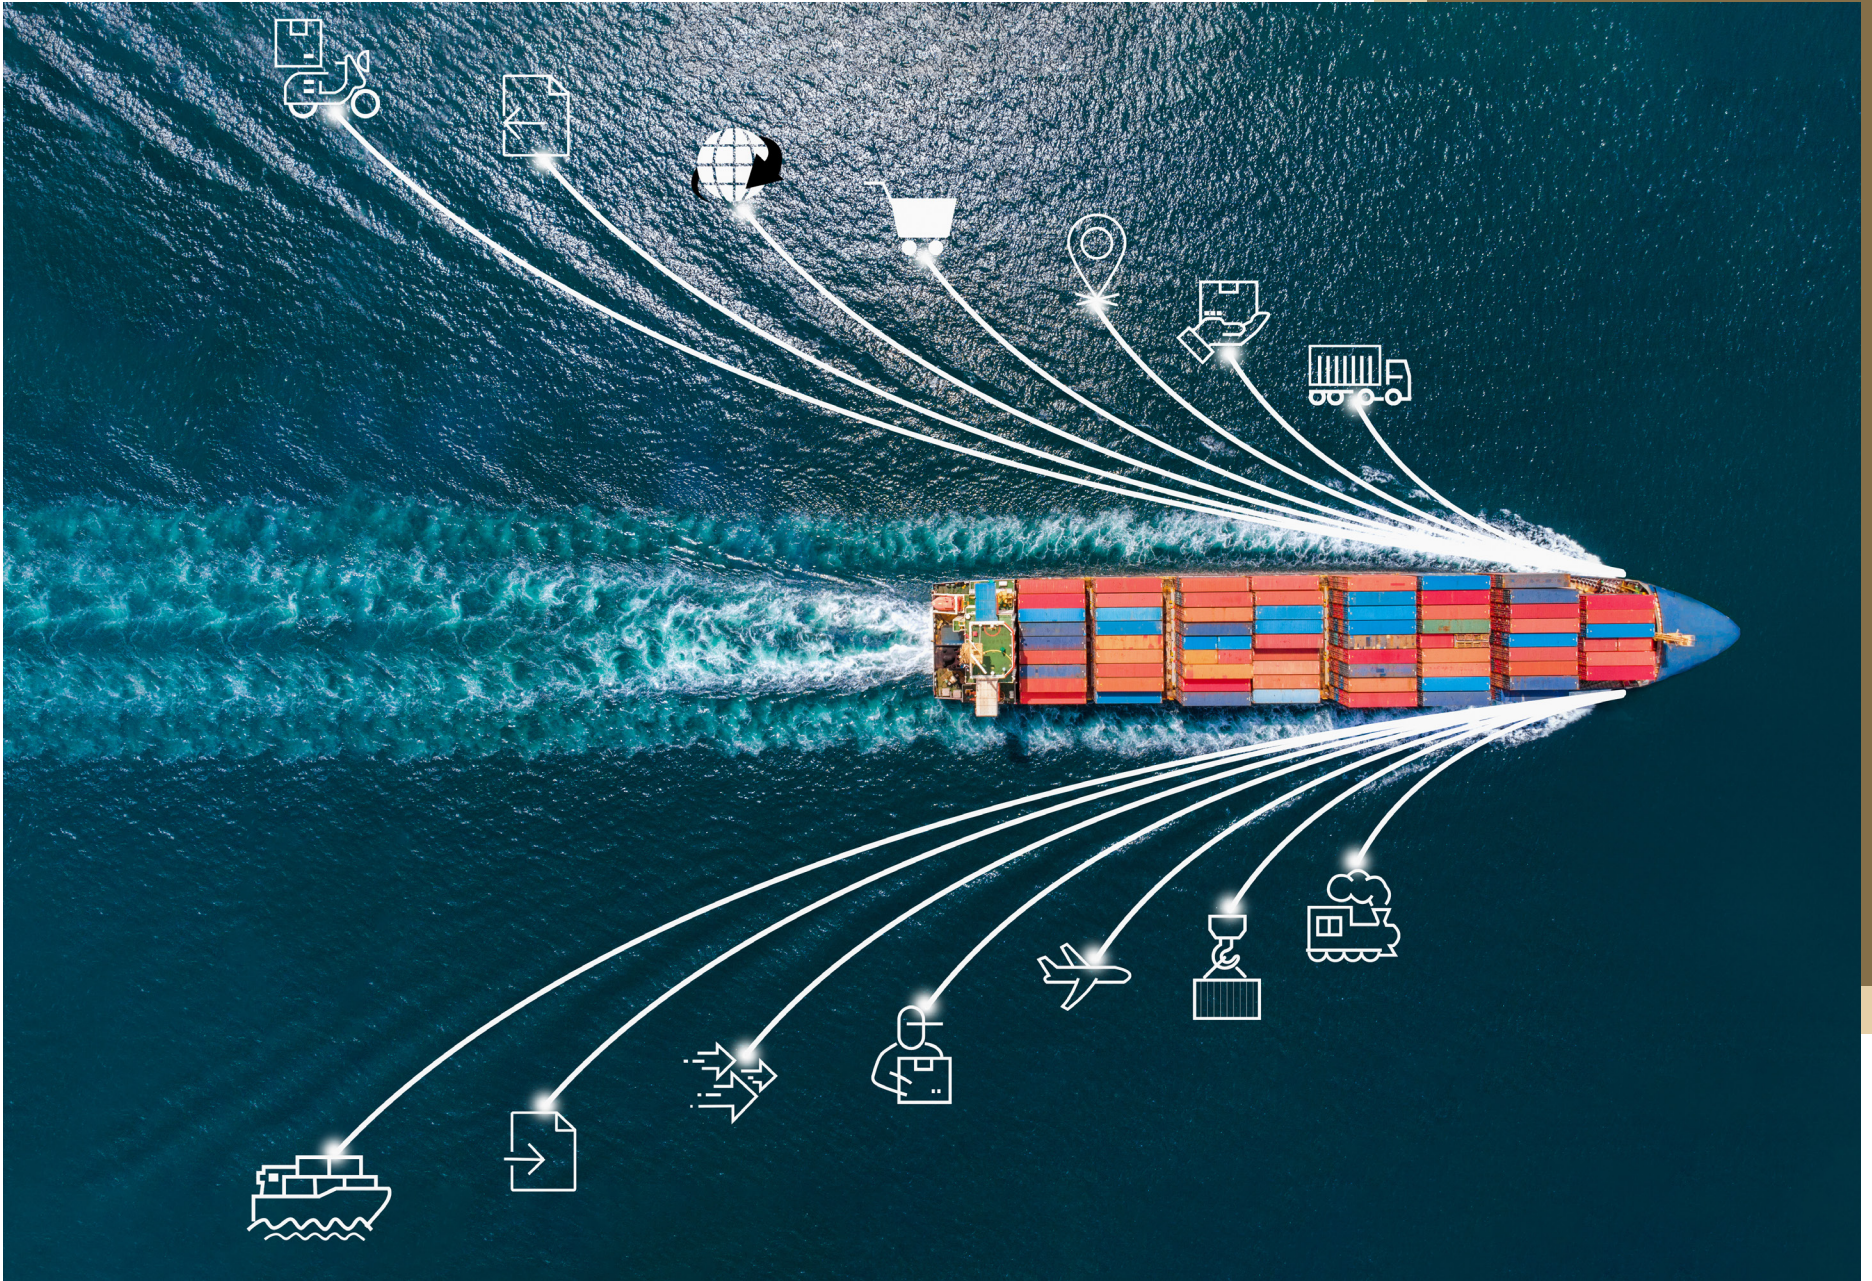

BUILDING THE FUTURE WITH STRENGTH, TRUST, AND INTEGRITY

At Hasanoğlu Group, we believe that the key to a prosperous future is a healthy professional relationship with clients, business partners, and, of course, high-quality Products.

Established in 2015, Hasanoğlu Group has become an exemplary construction materials manufacturing & exporting group. In 7 years since our establishment, we have provided a steady solution to virtually every construction material problem.

We have never failed to deliver a single project. The countless adversities we have faced have strengthened us and made us perform better the next time around. For this reason, we have created a powerful bond with our partners and customers.

OUR PRINCIPLES AND VALUES

To become a leading organization in the construction materials industry, we have developed a set of straightforward principles to which we adhere.

- **HIGH-QUALITY OUTPUT AT REASONABLE PRICES**

To help everyone achieve their vision, we are firmly set to keep our prices low so that even small businesses can avail of our services.

- **WORLD CLASS CUSTOMER SERVICE**

In all our projects, we assure all our clients of a seamless and hassle-free experience. Hence, we send our best engineers to oversee all our production lines and ensure all our products are up to the most exemplary standards.

- **FAST AND TIMELY DELIVERY**

Our company comprises skilled and experienced engineers and project managers, to ensure fast delivery so that our clients can meet their deadlines.

- **EMPOWERING CUSTOMERS**

At Hasanoğlu Group, we believe that a healthy relationship with our customers is the key to a prosperous future. That's why we never intervene with our client's plans unless we deem fit. We do everything we can to follow everything down to the tiniest detail to ensure 100% satisfaction.

- **NO COMPROMISES**

We consider every project as our chief priority. No matter its size, scale, specifications, or complexity, we are dedicated to making sure all our customer's plans come to fruition. We strive to meet all expectations set upon us. No excuses and trade-offs—only the best.

- **HIGHLY PROFESSIONAL WORKFORCE**

Our company works on the principle of consistently delivering the best results. Hence, we only work with people who think the same and hold themselves to the highest standards in terms of skill, integrity, practicality, and accountability.

- **GLOBAL CLIENTELE**

Customers from other countries across multiple continents comprise our clientele. Hence, all our materials and finished products are readily disassembled, shipped, and easily reconstructed at the destination. All of our projects are produced according to European standards and all that comes at a reasonable price only.

CONSTRUCTION MATERIALS EXPORT

CORRUGATED STEEL SHEETS

Corrugated steel sheets are the most robust profile with a traditional look, lightweight, easy to install, fire resistant and particularly cost effective.

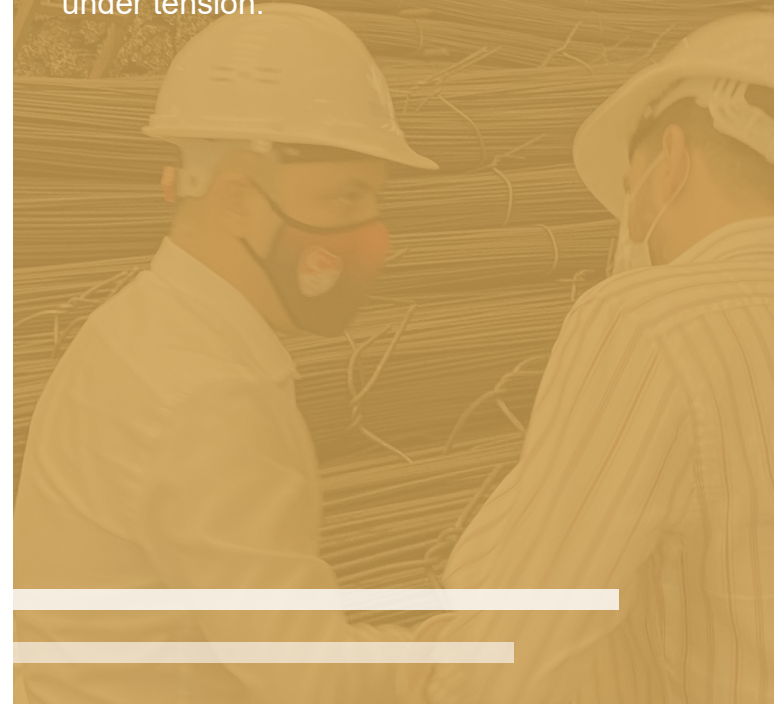

They are extremely weatherproof and can withstand intense weather conditions such as hailstorms, heat, snow, storms and even hurricanes.

REBAR STEEL

Rebar, known when massed as reinforcing steel or reinforcement steel, is a steel bar or mesh of steel wires used as a tension device in reinforced concrete and reinforced masonry structures to strengthen and aid the concrete under tension.

STEEL ROLLS

Steel rolls are an important part of every steel work shop, it can be used to create a wide array of arcs, bends, cylinders and circular objects. it is also an important part of custom materials fabrication.

STEEL PROFILE

Steel profiles are products made out of steel that has been shaped by being rolled, drawn or pressed.

These shapes have the same cross-section over their entire length. Most often used in reinforcing concrete or building structure, these steel profiles help to increase the strength of the projects they are used in.

STEEL PIPES

Steel pipes are cylindrical tubes made from steel that are used many ways in manufacturing and infrastructure.

They're the most utilized product made by the steel industry. The primary use of pipe is in the transport of liquid or gas underground—including oil, gas, and water.

AAC BLOCKS

Autoclaved aerated concrete (AAC) is a lightweight, precast, foam concrete building material suitable for producing concrete masonry unit like blocks. Composed of quartz sand, calcined gypsum, lime, cement, water and aluminum powder, AAC products are cured under heat and pressure in an autoclave.

SANDWICH PANEL

Sandwich panels are widely used as an external cladding for single and multi-story buildings, where they are required to provide weather resistance, and resistance to wind-loading, access loads, self-weight and so on.

HYDRATED LIME

Hydrated lime (calcium hydroxide) is a dry, colorless crystalline powder manufactured by treating calcium oxide (quicklime) with water, in a process called "slaking." Also known as slack lime, builders lime or pickling lime, hydrated lime is used in the production of mortars, plasters, cements, paints, hard rubber products, petrochemicals, and in the tanning of leather.

STEEL WIRE FENCE

One of the common uses of wire fence is for security reasons. The wire fence is often used for security fencing purposes. It can be utilized for commercial, residential or industrial installations, Another customary use of wire fence is to secure animals on the other hand it is best for gardens and widely used as road and rail fencing too.

CUSTOM ORDERS

We at Hasanoğlu Group offer our customers the service of supplying all kind of products and materials for them according to their specific needs and requirements.

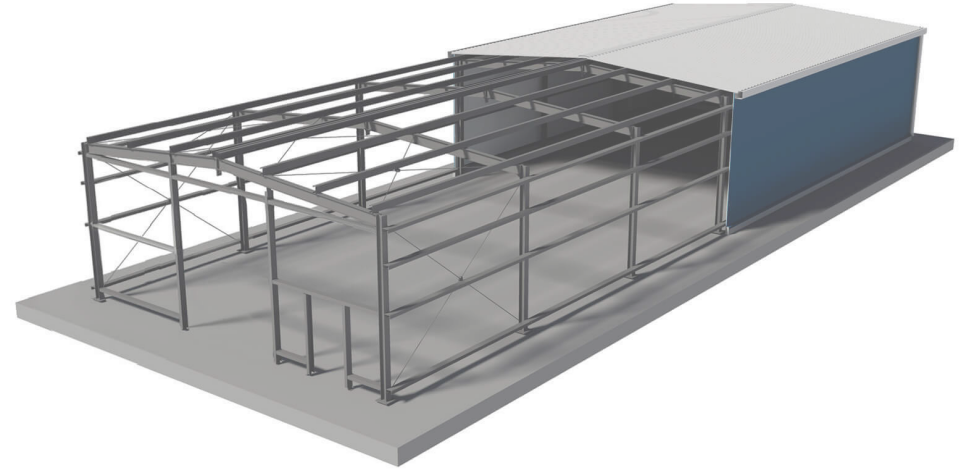

02

PRE-ENGINEERED STEEL BUILDINGS

ABOUT

A pre-engineered steel building is a modern technology where the complete designing is done at the factory and the building components are brought to the site in CKD (completely knock down condition) and then fixed/jointed at the site and raised with the help of cranes, pre-engineered steel building need less maintenance than similar structures of other materials and components.

WHY CHOOSE HASANOĞLU

Quality Products and Materials

Using high-quality steel, our company has accomplished almost any project imaginable, from small, individual projects to large-scale, industrial-level structures. We work with dozens of factories to source only the best quality materials and turn them into a bodacious work of engineering marvel.

CUSTOM PROJECT MANUFACTURING

Hasanoğlu fulfills your special steel manufacturing needs with its special project team. The team that we have formed for this purpose designs on-site projects. We provide turn-key delivery designs with our project design and manufacturing services.

AS HASANOĞLU, OUR PROJECT-SPECIFIC STEEL MANUFACTURING APPLICATIONS ARE AS FOLLOWS :

- We perform static-dynamic analysis of steel structures in accordance with regulations and specifications and prepare a static account report.
- We make static evaluations of points such as bracket connection and joint.
- We produce steel construction materials according to the specific needs of the projects.
- We prepare a manufacturing scheme taking into consideration the specific suggestions and demands of your work during the creation phase of projects.
- We implement projects in a short period of time and provide safe structures with assembly.

At Hasanoğlu, we work with the principle of providing quality control at every stage. The projects that we undertake are controlled at every stage from start to finish. Special steel manufacturing services are planned and implemented with a professional perspective.

03

INTERNATIONAL TRADE

Hasanoğlu Group

Provides service-oriented export trading, providing domestic and international companies the opportunity to import and export products to new and existing markets.

With a philosophy deeply rooted in extensive market knowledge and personal relationships, the objectives of all the business entities involved are always carefully evaluated in order to execute flawless and profitable transactions.

We are proud to supply our customers with all kinds of products and materials according to their specific needs and requirements.

04

LOGISTICS & SHIPPING

We at Hasanoğlu Group are looking to partner with you on every element of shipping cargo across the world from nation to nation, from islands to mainlands, from state to state, and from person to person.

We handle all aspects of logistics management, bringing efficient and cost-effective execution of tasks within all points in your supply chain.

Leading companies in every industry vertical have been working with Us for more than 7 years to address every logistics and shipping need. We have served almost every market in both the private public sectors, different organizations and individuals.
